

# Retail Beverage Tray

## Multi Purpose Merchandising Solution

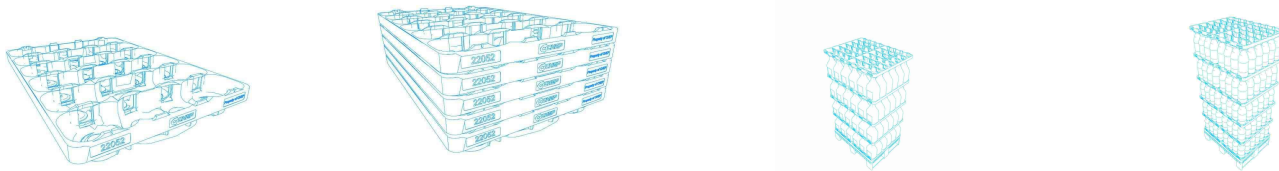

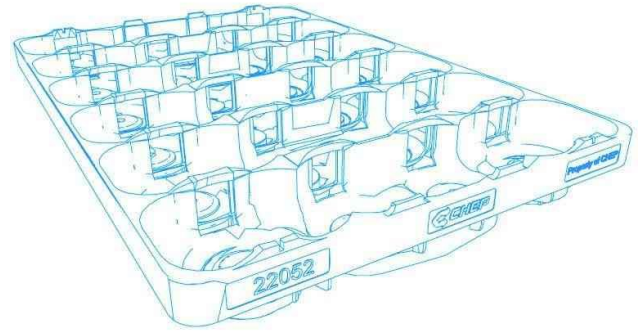

### Overview

The multi-purpose Beverage Tray creates a one-touch merchandising system to significantly reduce labour costs associated with hand stacking shelves.

The tray is configured to carry two types of PET soft drink bottles: 1.25 litre CSD and 2 litre Juice bottles with products displayed in 24 and 18 bottle configurations respectively on the same tray footprint.

The multi-purpose Beverage Tray, which can be used in fully automated packing systems, is lightweight, stable and protects drink bottles in transit. It is modular to CHEP plastic retail display pallets in single or double module configuration.

An Australian standard pallet also holds 6 drink modules and provides for a number of retail display options.

### Features and Benefits

- Unique multi-purpose tray accepts 1.25 litre carbonated & 2 litre juice bottled products
- Smart design ensures load stability, bottles are secured at the base and closure points
- Non-porous surface
- Foodgrade 100% Polypropylene virgin plastic material
- Lightweight at just over 1 Kg per tray
- The multi-purpose Beverage Tray enables One Touch movement from production line to retail display
- Reduced handling lowers the risk of product damage through the supply chain
- Increased transportation yield delivered with 5 layer stacking configuration
- Multi-purpose module configuration improves store floor utilisation via increased product ranging options
- Modular to CHEP plastic retail display pallets and CHEP Standard pallet
- Low profile stacking when empty allows for improved transport & storage efficiency
- 100% recyclable, the Beverage Tray eliminates costly one trip cardboard packaging

### Specifications

#### Dimensions - in millimetres

Length	Width	Height
577	385	63

#### Nominal Capacity and Weight

Tare weight	1.1	kgs
-------------	-----	-----

#### Configuration and Stacking

Stacked layers	38
----------------	----

- Minimum & Maximum stack capacity of 18 x 2 litre juice bottles or 24 x 1.25 litre CSD bottles fully loaded within the locating ribs of the tray
- Trays may be stacked 5 high for CSD and 4 high for Juices when loaded
- Safe Working Load is determined by strict compliance to the recommended stacking configuration.

#### Temperature Range

Minimum / Maximum	0 °C / 40 °C
-------------------	--------------

### Notes

#### Materials

Injection Moulded Polypropylene

#### Recommended Use / Applications

Retail floor display

#### CHEP Code

22052- Multi Beverage Tray
